

BEFORE UPDATING STSL!!!! DO THE FOLLOWING.

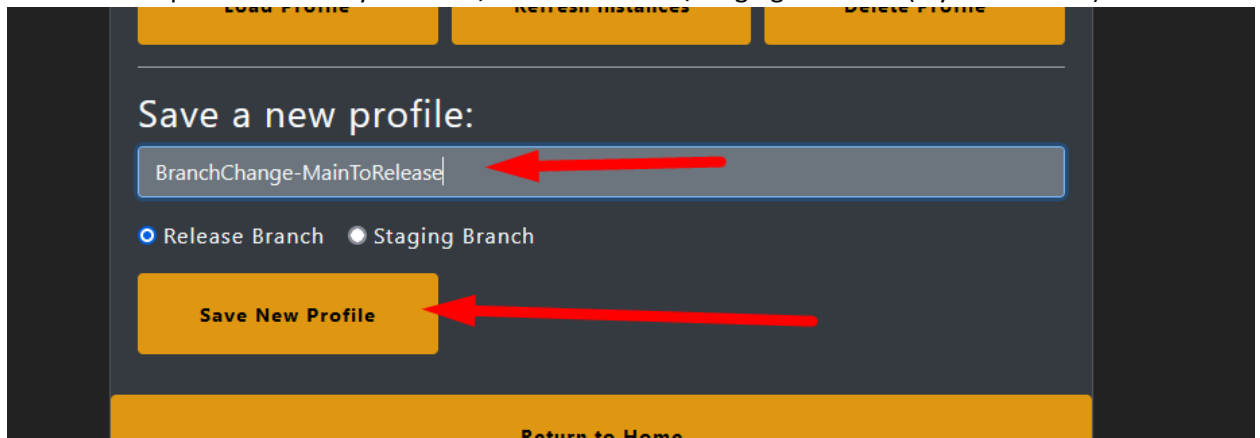

1. Go to Change ST Profile

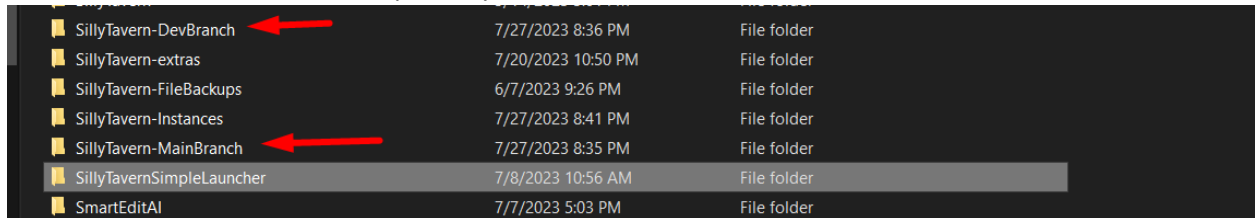

2. RUN A GODDAMN BACKUP FOR THE LOVE OF CHRIST I WILL NOT BE HELD RESPONSIBLE IF YOU LOSE ALL YOUR CHARACTERS AND CHATS

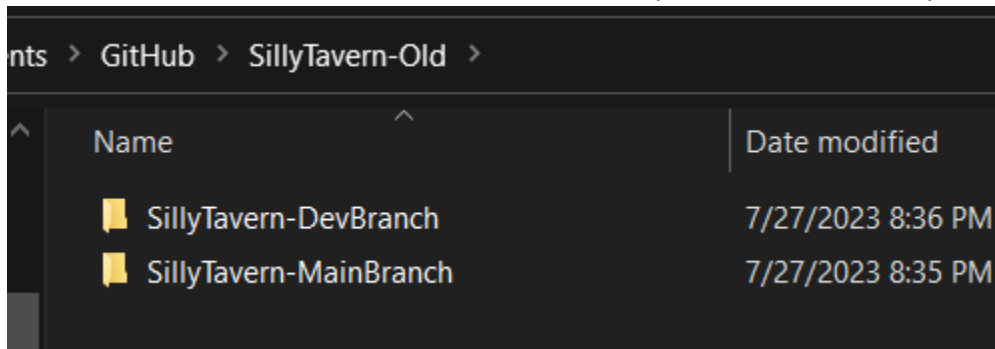

3. Create a new profile for both your Main/Release and Dev/Staging Branches (if you use both)

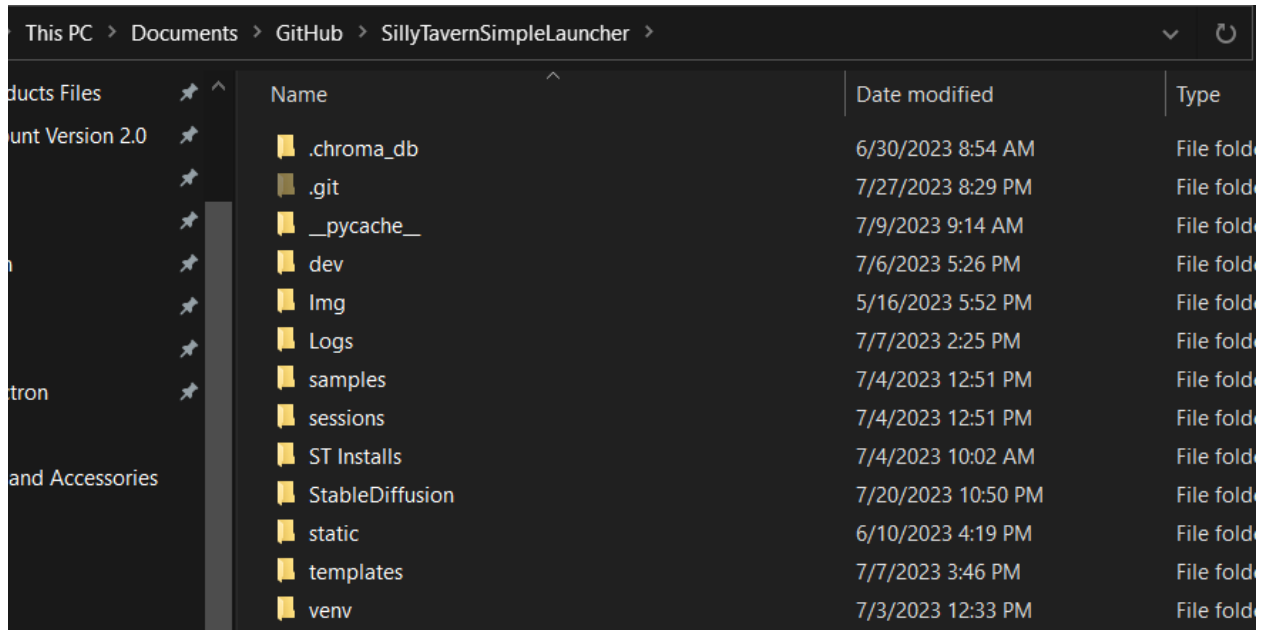

4. Go to the folder where you have the “SillyTavern-MainBranch” and “SillyTavern-DevBranch” folders, it should be one folder up from your STSL folder.

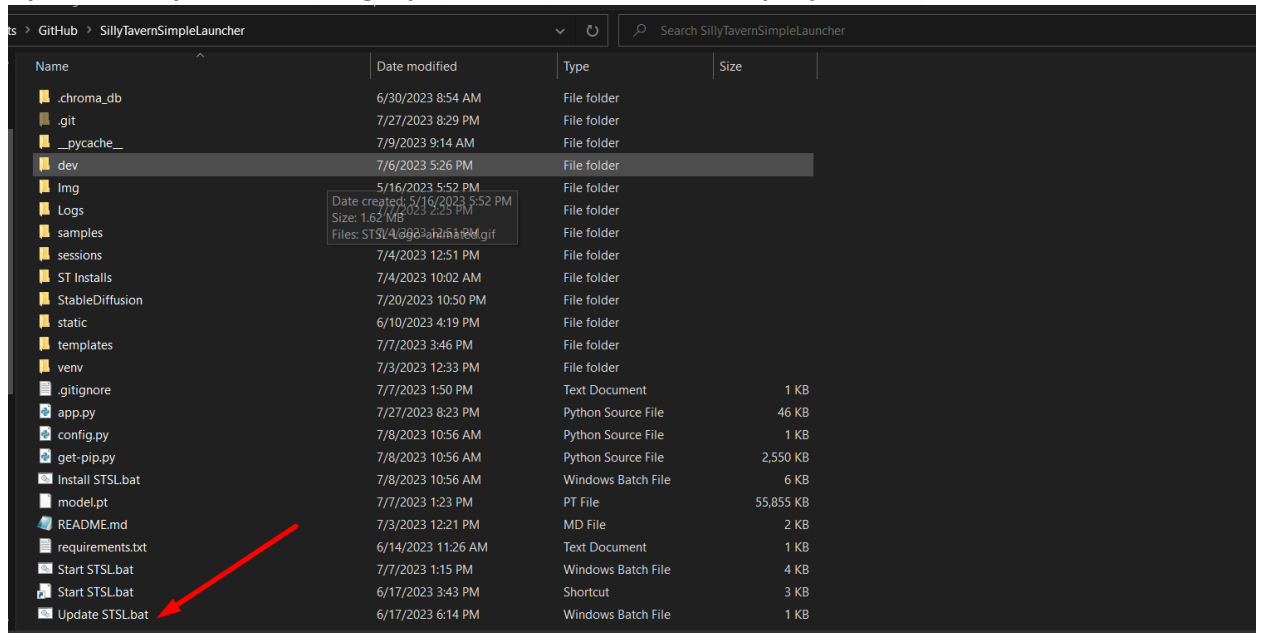

5. Move both of those folders into a different folder that you create such as “SillyTavern-Old”

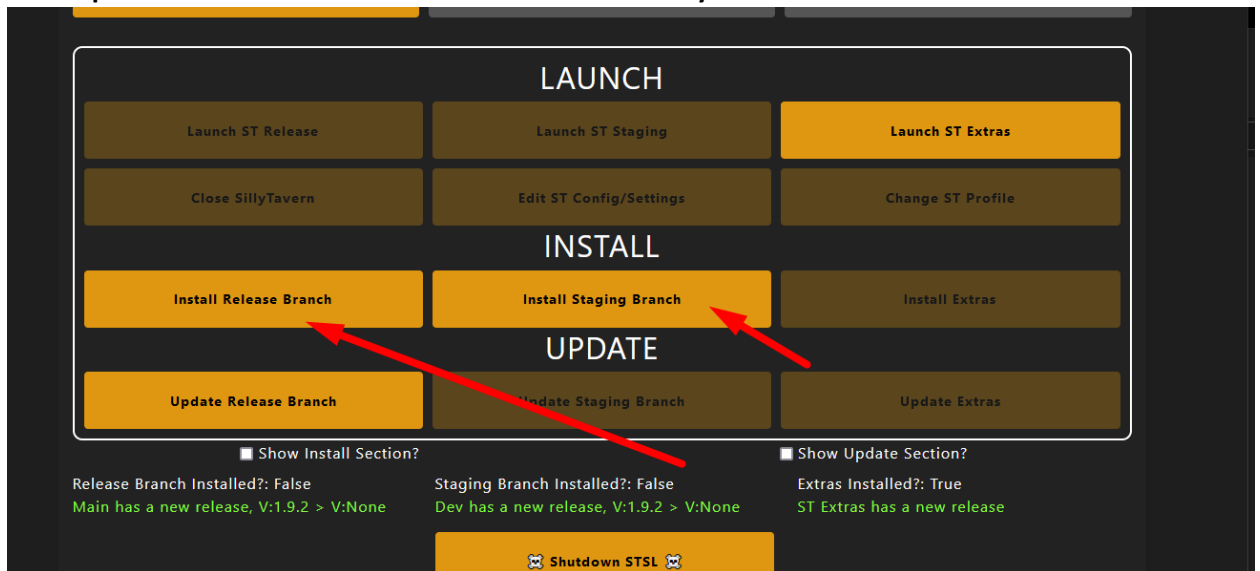

6. Go back to the STSL folder

7. If you installed via git originally congrats, you have it easy, just run the “Update STSL.bat” file and it will auto update, if you installed via zip file, delete the folder and reinstall from a new zip, or better yet install from git (just do it, it’s so much better pls, just do it)

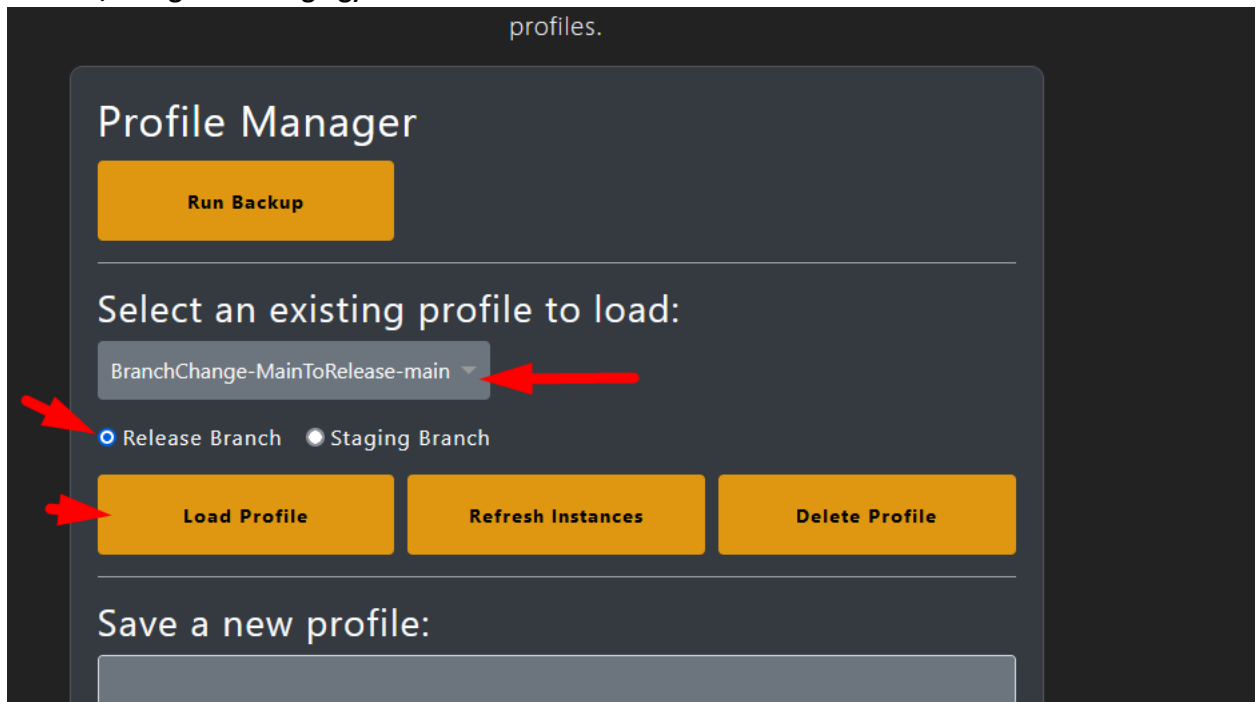

8. Once updated Start STSL. Then install which ever branch you want.

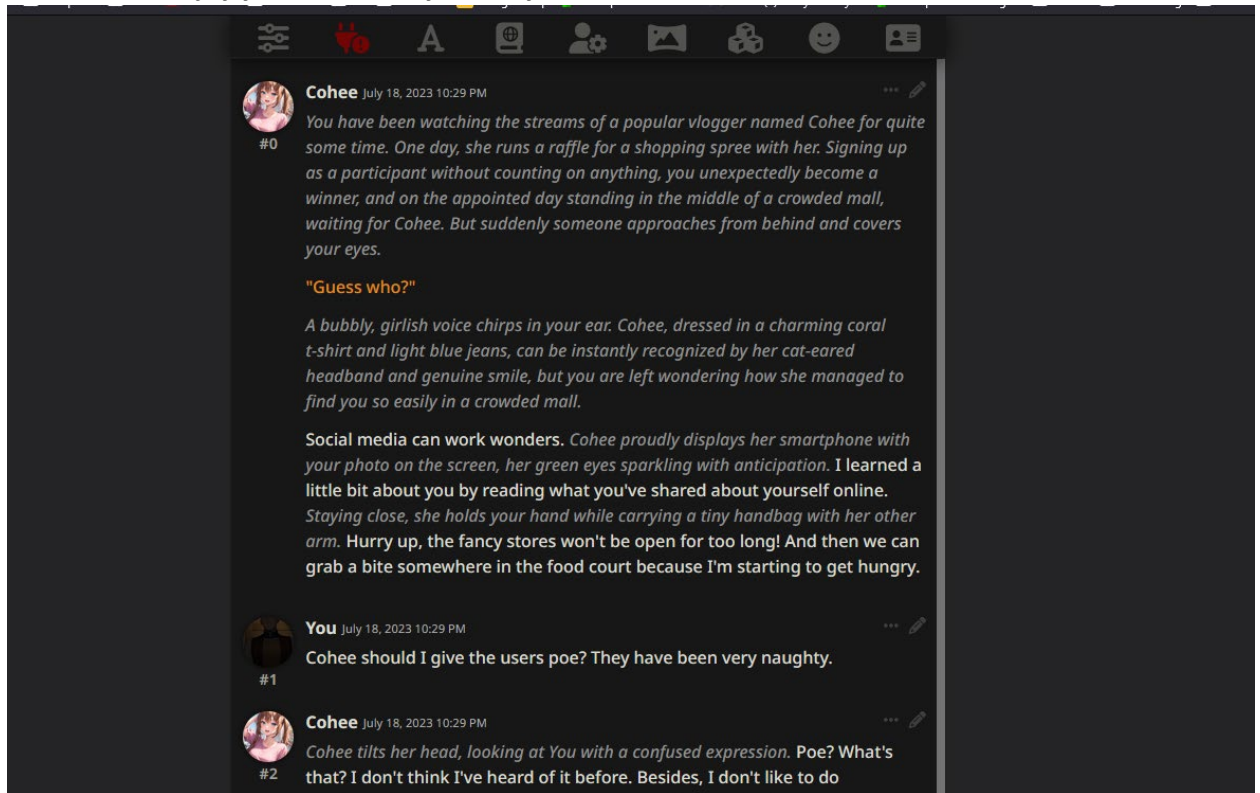

9. Once installed, go to “Change ST Profile” again.

10. Choose the profile you saved prior to updating and load it to the correct branch (Main goes to Release, Dev goes to Staging)

11. You're done, enjoy your robot sex you filthy animals.

(no poe is not coming back, this is an old screenshot)
